Internet & Wireless Application Practice

"Idhasoft is a global world-class organization providing best-of-breed localized business and technology solutions, with continuous innovation and quality backed by best-in-class people"

Grey Matter India- An Idhasoft Company

Microsoft .NET Technology

The software solutions development scenario has seen a major revolution since the introduction of the .NET framework by Microsoft. The .NET Framework is an integral Windows component that supports building and running the next generation of applications and XML Web services. Its unique characteristics including a feature-rich application execution environment, simplified development and easy integration across a variety of development languages are expanding its acceptance worldwide. .NET framework is designed to provide an object-oriented programming environment that guarantees the safe execution of code and eliminates issues regarding performance that are normally associated with scripted environments.

GMI .NET Practice

GMI has prided itself at possessing the ability to foresee major shifts in the technology domain. Ever since the inception of the Microsoft .NET framework, GMI has been extensively developing web, desktop and console applications using the technology. Our Microsoft .NET developer and ASP .NET programmer's team is trained and ideally equipped to fulfill objectives such as providing a code-execution environment that minimizes version conflicts, promotes safe execution of code and eliminates the performance problems of scripted or interpreted environments. Providing a consistent performance across an extensively varying array of applications and building all communications while conforming to world standards form the crux of our objectives. Keeping pace with the current scenario of collaborative manufacturing production and supply chain integration, our options follow the most commonly used standards to offer the easiest integration with different platforms and software packages.

Our .NET technology expertise hails from

- **Retail Domain Leaders** – Core Competency Subject Matter Experts
- Extensive & skilled development experience on **Microsoft .NET framework**
- Enterprise solution development for smarter inventory management, POS system and **B2B, B2C, C2C** solution development
- **Proven .NET development** experience
- **Proven Web 2.0** Development Skills – As a low cost provider
- **Open Source Leadership** – Powerful systems can be designed truly from a high performance / low cost standard
- **Business Intelligence /Consulting approach** – dedicated consultants to work with the client to help implement and mould his/her ideas into end results.

Our Microsoft .NET competencies include

- NET Enterprise Servers
- Visual Basic.NET
- C#
- .NET Compact Framework(2.0 and 3.0)
- Web Forms, Web Services and Web Server Controls
- Web Services, SOAP, WSE, SOA, UDDI
- Win Forms
- ASP.NET, ADO.net
- SQL Server 2000/2005
- Windows CE.NET
